 Atención

Vor der Erstinbetriebnahme müssen die beiden Einrichthilfen an den Füßen wieder entfernt werden. Die Motoren könnten sonst beschädigt werden.

Before the first initial operation you have to remove once again the two help for setup at the feet. Otherwise it is possible that the motors could be damaged.

# Gebrauchsinformation

## Information for use

## Information d'emploi

## Información de uso

Die Einschaltdauer 2,5 Minuten „ON“ darf nicht überschritten werden. Eine Überschreitung zerstört das System.

Große Punktlasten, sowie stark einseitige Belastungen sind zu vermeiden. Beim Beladen der Anbauten ist darauf zu achten, dass keine großen dynamischen Kräfte entstehen. (z.B. Kartons auf die Ablageböden schmeißen)

Bei den Ablagen ohne gesonderte Angaben zur max. Belastung gilt eine max. zulässige Fachlast von 25 kg.

Grundsätzlich gilt eine max. Feldlast von 60 kg und eine max. Flächenlast auf der Tischplatte von 100 kg.

---

The duty cycle of 2,5 minutes “ON” must not be exceeded. If this duty cycle is exceeded, it destroys the system.

Avoid large point loads and heavy one-sided loads. While loading the extensions, take care that no large dynamic forces are created (e.g. throwing boxes on shelves)

Shelves without separate information have a max. surface load of 25 kg.

In general, a max. bay load of 60 kg and a max. surface load on the table top of 100 kg applies.

---

Le durée d'activation de 2,5 minutes “ON” ne doit pas être dépassé. Le transgression détruit le système.

Évitez les charges ponctuelles importantes et les lourdes charges unilatérales. Pendant le chargement des extensions, veuillez à ce qu'aucune force dynamique importante ne soit créée (par exemple en lançant des boîtes sur les étagères).

Les étagères sans information séparée ont un max. charge de surface de 25 kg.

---

No se debe sobrepasar el tiempo de marcha „ON“ de 2,5 minutos. Un desborde destruye el sistema.

Par Compartiment s'applique un max. charge de 60 kg et un charge de surface sur le dessus de table de 100 kg.

Grandes cargas puntuales y cargas unilaterales son de evitar. Se deben evitar las fuerzas dinámicas al cargar sobre los soportes superiores (por ejemplo evitar de echar/tirar paquetes sobre los estantes)

La carga máxima por estante sin ninguna otra indicación es de 25 kg.

Básicamente la capacidad de carga entre los largueros/extensions es de 60 kg y la máxima carga superficial sobre el tablero de la mesa es de 100 kg..
