SYSTEM FLEX

SYSTEM FLEX is perfect for everyone who wants limitless flexibility and quickly adaptable ergonomics.

Summary of special features

- sturdy and highly flexible concept due to Rocholz mounting profiles
- grid perforation in Rocholz mounting profiles allows fast attachment of shelves, roll holders, etc.
- the top section of the Rocholz mounting profiles can be mounted upright or inclined by 20°, this improves the reach position to the shelves and accessories significantly
- because the Rocholz mounting profiles are separated from the table's feet, add-on components can be moved horizontally and positioned at will on the frame
- extensive range of accessories

SYSTEM FLEX Light

SYSTEM FLEX Light allows you to use the advantages of the pro-version at the price of an entry-level system.

Basic table set

- W 1,650 x D 800 x H 720-1,220 mm
- electric height adjustment
- includes three Rocholz mounting profiles
- includes two perforated back panels
- extensive range of accessories

Advantages

- proven Rocholz quality at a low price
- high performance and cost-effective

ACCESSORIES PACKAGES

Three different theme packages are now available for our SYSTEM FLEX and SYSTEM FLEX Light packing tables as a simple option! Ideal for quick and uncomplicated ordering, these three packages offer standard requirements for the following areas: basic equipment, ergonomics and IT.

All three theme packages can also be combined to obtain a fully equipped packing table that leaves nothing to be desired. Our theme packages guarantee less effort while consulting customers, and are quick and easy to order.

BASIC EQUIPMENT^① Art. 73805203

- three shelves (W 800 x D 300 mm)
- eight shelf dividers open
- Utensilo
- holder for adhesive tape dispenser

ERGONOMICS PACKAGE^② Art. 73805201

- workplace lighting (W 976 mm)
- bottle holder
- ergonomic workplace mat

IT PACKAGE^③ Art. 73805202

- monitor holder (reach 505 mm, max. load 15 kg)
- mouse and keyboard tray
- connection cable and cable clamps
- 4-way socket

SYSTEM 2000

General information

- three widths are available as standard
 - height-adjustable
 - extensive range of accessories
 - custom design possible
- corner solutions/interlinking offer numerous design options
 - use as a single packing station or packing line
 - roller track tables

The roller track table in SYSTEM 2000

- with work surface as packing table
 - optional: integrated scale
- without work surface as a transport/buffer table

SYSTEM BASIC

SYSTEM BASIC offers essential features at an attractive price.

Inexpensive entry-level system

- W 1,600/2,000 x D 800 x H 850 mm
- modular build
- standard components
- range of accessories limited to the essentials

Advantages

- proven Rocholz quality at a low price
- short amortisation period

Now also
height-adjustable
in the range
690-960 mm.

Art. 712000

You will find
more products
in our shop.

MODUL 5000

Thanks to the intelligent build, MODUL 5000 can be adapted to the worker and their work in just a few fast steps.

Maximalistic

- W 2,000 x D 1,040 x H 1,330 mm
- can be adjusted using a crank mechanism or via electric motor for maximum convenience
- internationally recognised (iF Design Award)
- extraordinary and ergonomic design

Advantages

- easily adapts to people and surroundings
- modular build

ROLLER TRACK TABLES

Bring some dynamism to your logistics

Our roller track tables are the perfect solution for packing stations where heavy parcels need to be moved. By integrating seamlessly into your packing table environment, they help you optimise workflows, increase throughput and significantly reduce the workload on your staff.

Whether it's SYSTEM FLEX, SYSTEM 2000 or MODUL 5000, we have roller track tables to suit every system.

Art. 73400700

We make stress visible For a healthy team

Ergoficiency® makes workload measurable: our anonymised sensor analysis provides objective data on movement, vital signs and the working environment. Rather than relying on gut feeling, we use precise facts to targetedly reduce your team's workload and design workplaces that are healthy and productive.

PROCESS CHECK

What processes are there, and how can they be optimised?

ERGONOMICS RADAR

In what situations do you adopt positions that put strain on your body (e.g. bending down low or lifting heavy objects)?

HEALTH CHECK

How physically demanding is the work during a shift?

ENVIRONMENT CHECK

How do light, noise and temperature affect concentration?

ERGOFICIENCY[®]-PACKAGES AT A GLANCE

Focus Analysis

A quick start to tackling specific problems.

PACKAGE

S

Your result: You'll receive a detailed report that identifies the biggest health hazards and time-wasters in this area – complete with immediate tips on how to improve things.

What we do: We will fit one selected member of staff with our sensors for one working day at your site.

What's being analysed: We precisely measure this person's movements and physical strain during all work processes (e.g. when packing or picking orders).

Location Analysis

A reliable database for your entire team.

PACKAGE

M

Your result: In addition to the focus analysis, you will receive a comprehensive analysis of your workplace, backed up by reliable data, which will identify the areas you need to address in order to ensure the overall health and performance of your team.

What we do: We are extending the analysis to a total of four employees.

What's being analysed: By assessing four people, we obtain an objective overall picture. We can see whether the stress stems from the workplace itself or from different working methods.

System Analysis

The complete solution for maximum cost-effectiveness.

PACKAGE

L

Your result: In addition to the site analysis, you will receive

ROI recommendations: We will calculate exactly when the optimisations will start to pay off for you financially.

Action workshop (60 mins): We work with your team to find the best solutions.

Implementation plan: You will receive a heat map showing areas of high traffic and heavy use, as well as a fully developed plan for the appropriate processes and the necessary hardware.

What we do: We are extending the analysis to a total of eight staff members over two days.

What's being analysed: We link work performance to the actual physical strain involved and the external conditions.

ASSISTANCE SYSTEMS

Now also available **system-independent.**

DOCUMENTABLE

Art. 73800100 / 73800000 (Box)

- Integrated photo documentation of parcel contents
- Distinct classification of stored data
- Transmission via LAN into your own server structure, connection to your own ERP system possible
- All-on-one solution without follow-up costs

Watch video

Watch video

SIMPLE ASSIST

- Stand-alone assistance system without interface to other systems
- Can be set up, operated and run without IT knowledge
- Create work instructions easily and barrier-free with MS PowerPoint®
- Ergonomic, self-determined work with digital guidance
- Self-explanatory system, no training required

ASSISTABLE

Watch video

- Economical added-value service
- Self-determined work in spite of product individualisation and large variety
- Server-based system that can be operated location-independently
- Automatic generation of economic indicators via digitalisation

A maintenance service can be booked for all assistance systems.

We look forward to talking to you about your individual requirements. Together, we will find the best solution for you!

You will find more products in our shop.

PROTECTABLE

Protectable is our SYSTEM FLEX add-on for integrating an automatic air cushion machine into your logistics workplace.

Advantages

- efficient and ergonomic
- suitable for all standard air cushion machines
 - electric lift for easy roll material changes
 - storage silo for the finished air cushions
- this system makes for simple and safe packaging processes

CUTTING SYSTEMS

Better results with Rocholz cutting systems.

Application

- roll material such as paper, corrugated cardboard and film
- cutting systems with dispensers
- free-standing or directly at the packing station

Fast change

The cutter cartridges can be changed without effort. We supply two cutter cartridges as standard!

Discover also our **dispensers**.

LIFT TABLES & TABLE LIFTS

Load-bearing boost for logistics – these practical helpers take on the load of heavy parcels and lift and lower them without effort.

1. Mobile lift table

Art. 209040

Height adjustment with gas pressure cylinder.

2. Mobile electric lift table

Art. 209050

Incl. height adjustment via electric motor
Battery pack, mobile with 4 swivel castors.

3. Stationary electric lift table

Art. 209051

Height adjustment via electric motor
with three working height memory positions.

4. Pneumatic lift table

Art. 209103 resp. 209104

Stainless steel platform W x D 450 x 600 mm
incl. foot switch, stroke 500 mm resp. 700 mm.

5. Pneumatic lift table for bolting to floor

Art. 209102

Like pneumatic lift table, table prepared for
fixed bolting to floor.

6. Pneumatic lift table

Art. 209100

Allows effortless lifting and lowering of
heavy cartons 250 mm stroke.

ELECTRIC TABLE LIFT

Art. 209060

General information

- W x D x H – 450 x 860 x 960 mm
- electrical height adjustment in the range of 360-860 mm, stroke 500 mm
- max. load capacity 50 kg
- moving speed empty 64 mm/sec, with max. load 45 mm/sec
- stainless steel platform W 450 x D 600 mm

Advantages

- ergonomic and fast thanks to foot switch
- no compressed air connection required
- high load capacity
- ergonomic solution when electrically adjustable tables are not possible

PACKING TABLE CONFIGURATOR

The packing table configurator supports you in your planning. With the online-tool, you can put together your desired packing table configuration with just a few mouse clicks and can also request it directly from us; either by yourself or together with your sales partner.

Please feel free to contact us.

ERGONOMICS ANALYSIS

Do you want to know whether you are working ergonomically?

We will answer your question.

Whether it's a quick analysis using a smartphone or a cross-process sensor-based solution - as ergonomics experts, we have the right motion analysis tool for every requirement. These focus on improving ergonomics in work processes by analysing movement and workflows in companies in detail.

A real-time analysis that measures movements at work using the latest IoT-based sensor technology, calculates forces IN the body and derives customised recommendations for improved ergonomics.

Fast analysis with a smartphone or tablet using markerless 3D recording of joint points in real time.

Data on work movements and processes are recorded and then analysed. This data is crucial for optimising the health, well-being and efficiency of employees and thus also promoting the efficiency of the company.

Contact us, we will be happy to advise you!

ERGONOMIC MACHINE INTEGRATION

Art. 73805800

Optimise your processes by integrating your paper machine into the packing table in a space-saving and ergonomic way. Discover our selection of highly functional packing tables for optimised workflows.

Application

- for electric and manual SYSTEM FLEX base table
- Add-on package for single packing tables consisting of 3x shelves, 2x shelf dividers open, 1x Utensilo und 1x holder for tape dispenser
- also available as a double workstation with manual height adjustment

PACKING TABLE WITH LIFTING UNIT

Art. 73002200

General information

- W 2,000 x D 800 x H 750-960 mm
- height manually adjustable
- max. surface load 300 kg
- incl. foldable table extension W 410 x D 800 mm
- platform of lifting unit W 800 x D 600 mm
- max. surface load of the lifting unit 80 kg
- lifting unit speed 55 mm/sec, stroke 350 mm
- integrated crush protection

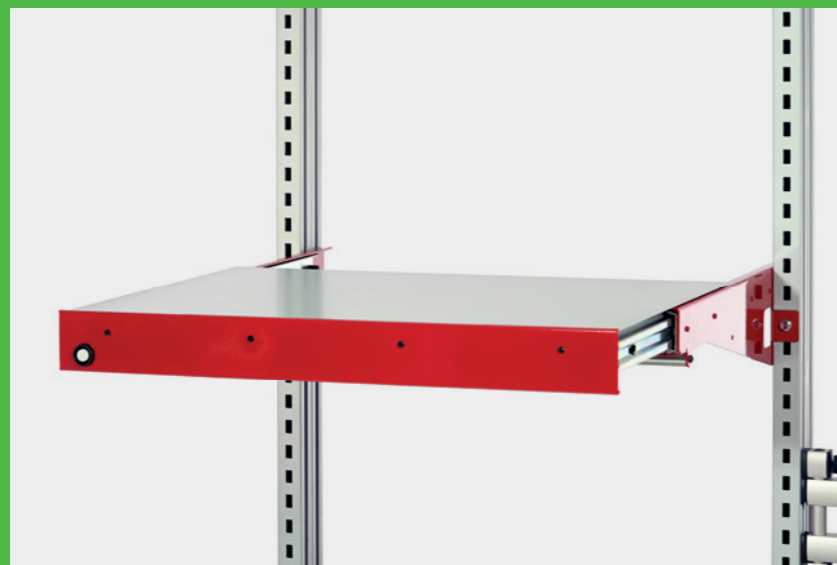

Advantages

- practical lifting unit integrated directly into the packing station
- ergonomic work support
- quick and easy operation by foot switch
- high load capacity
- fast height adjustment for frequently changing package sizes
- ergonomic solution when electrically adjustable tables are not possible
- ideal for shift work and frequently changing employees

HEAVY DUTY

Our new highlight that will inspire you HEAVILY!
We have made our Rocholz mounting profiles even stronger.

RETRACTING SHELF

Art. 73304100

You can easily accommodate printers, air cushion machines or other „heavy equipment“ with the matching retracting shelves for the double Rocholz mounting profiles. With these, you can also access your equipment ergonomically, e.g. when you need to change a material roll.

max. surface load 60 kg

You will find
more products
in our shop.

ROCHOLZ MOUNTING PROFILE

Art. 73308010

The double Rocholz mounting profiles can carry even more weight, and nothing will make them waver. Naturally, you can still attach your SYSTEM FLEX accessories to the Rocholz mounting profiles with perforation, and adjust them quickly and easily.

SHELF

Art. 73306500

An additional support is available for SYSTEM FLEX shelves, turning the standard shelves into a heavy-duty version. The reinforcement strut is attached to the Rocholz mounting profile and to the carrier arm of the shelf.
