
ROCHOLZ
WORKPLACES FOR LOGISTICS
ERGOFICIENCY®
by Rocholz
HEALTHY EMPLOYEES. EFFICIENT PROCESSES. MEASURABLE SUCCESS.

Solving logistics challenges

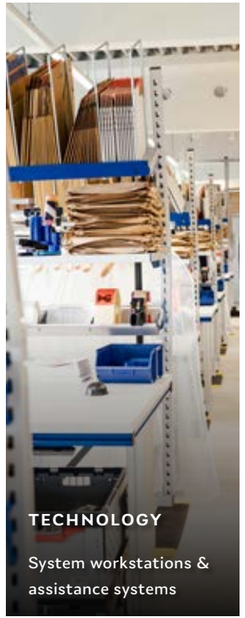

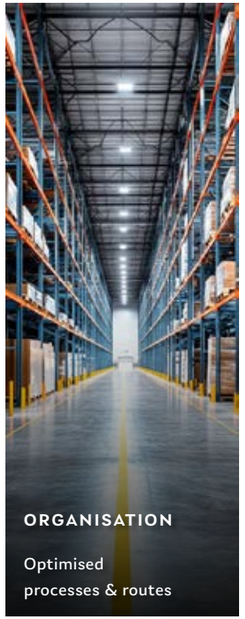

A lack of transparency costs a site with 20 employees over € 300,000* a year.

* Sources: BAuA (2024): Economic costs of incapacity for work (approx. € 5,376 loss of value added per employee per year); DAK Health Report (2025): Sector Focus Logistics (record sickness absence rate of over 6 %); IW Cologne (2025): Brief report on continued payment of salary and staff turnover costs in the German economy.

Three key factors for your success

Only when technology and people are perfectly aligned can we achieve maximum ergoficiency®.

We make stresses visible
For a healthy team

Ergoficiency® makes workload measurable: our anonymised sensor analysis provides objective data on movement, vital signs and the working environment. Rather than relying on gut feeling, we use precise facts to specifically reduce your team's workload and create healthy, productive workplaces.

PROCESS CHECK

What processes are there,
and how can they be optimised?

ERGONOMICS RADAR

Where do awkward postures occur
(e.g. excessive bending or heavy lifting)?

HEALTH CHECK

How physically demanding is the work
during a shift?

SOURROUNDINGS CHECK

How do light, noise, and temperature
affect concentration?

Modular approach

ERGOFICIENCY® PACKAGES

S

FOCUS ANALYSIS

A quick start to tackling specific problems.

M

LOCATION ANALYSIS

A reliable database for your team.

L

SYSTEM ANALYSIS

The complete solution for maximum cost-effectiveness.

S

Focus Analysis

A quick start to tackling specific problems.

Your result: You'll receive a detailed report that identifies the biggest health hazards, and time-wasters in this area – complete with immediate tips on how to improve things.

What we do: We will equip a selected member of staff with our sensors for one working day at your site.

What is analysed: We precisely measure the movements and physical strain involved in all work processes (e.g. when packing or picking).

Location Analysis

A reliable database for your team.

Your result: In addition to the focus analysis, you will receive a comprehensive analysis of your workplace, backed up by reliable data, which will identify the areas where you need to take action to ensure the overall health and performance of your team.

What we do: We are extending the analysis to a total of four employees.

What is analysed: By assessing four people, we obtain an objective overall picture. We can see whether the stress stems from the workplace itself or from different working methods.

M

L

System Analysis

The complete solution for maximum cost-effectiveness.

Your result:
In addition to the location analysis, you will receive

ROI recommendations: We'll calculate exactly when the optimisations will start to pay off for you.

Action workshop (60 mins): We work with your team to find the best solutions.

Implementation plan: You will receive a heat map showing areas of high traffic and activity, as well as a ready-made plan for the appropriate processes and the necessary hardware.

What we do: We are extending the analysis to a total of eight staff members over two days.

What is analysed: We link work performance to actual physical exertion and external conditions.

Comparison of packages

YOUR WAY TO ERGOFICIENCY®

PACKAGE S

Scope of the analysis:
1 employee

Duration on site:
1 day

Process & Ergonomic check:
Measuring movement patterns and physical strain directly in the workplace

PACKAGE M

Package S, with the following extension:

Scope of the analysis:
4 employees

Detailed sketches

PACKAGE L

Package M, with the following extension:

Scope of the analysis:
up to 8 employees

Duration on site:
2 days

Heat map analysis,
ROI recommendations,
Action workshop,
Process- & hardware concept

Data security & anonymity

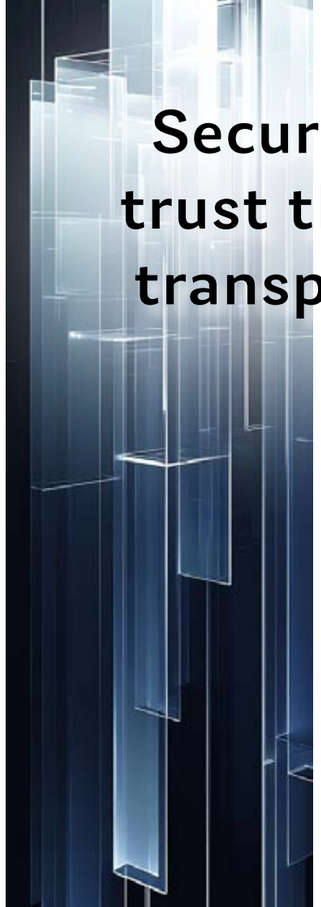

- 100% GDPR-compliant: Data is collected in a completely secure manner, and in accordance with applicable data protection standards.
- No monitoring: There is no monitoring of behaviour or performance. The data is completely anonymised, and does not allow any conclusions to be drawn about individual people.

Acceptance through participation

- Involvement of the team: Staff are actively involved in the process.
- Transparency: The purpose of the measurement (to protect health and make work easier) is clearly communicated, which ensures a high level of acceptance.

Scientific basis

- Objectivity: The results are based on valid measurement data, not on subjective estimates.
- Prevention: The analysis is designed to identify health risks at an early stage and proactively minimise them.

Security and trust through transparency

An investment that pays off

+220 % PROCESS PERFORMANCE IN PRACTICE

The background (The problem)

- Unstructured workflows and time-consuming searches.
- High physical strain on staff due to non-ergonomic reach distances.
- Consequence: Declining efficiency and high physical strain in day-to-day operations.

The Ergoficiency® solution (The lever)

- Analysis: Precise measurement of actual movement patterns and peak loads using sensor data.
- Optimisation: Targeted ergonomic adjustments to the workstation based on the results of the analysis.
- Implementation: Eliminating unproductive movements and reducing physical strain.

The result (The proof)

- A leap in efficiency: a 220 % increase in process performance thanks to optimised workflows.
- Return on investment (ROI): the total investment (€ 44,200) is fully recouped after just 6 month.
- Long-term benefits: a lasting reduction in process costs and safeguarding employee health.

ROCHOLZ
WORKPLACES FOR LOGISTICS

Your start in the Ergoficiency®

CLARITY RATHER THAN GUT FEELING – LET'S KEEP THE DIALOGUE GOING

PERSONAL EXCHANGE

We'll discuss the specific challenges you face at your site. Which workstation is currently causing you the most concern?

NO-OBLIGATION VIEWING

We'll come and take a look at your processes on site to get a feel for how things work.

A TAILOR-MADE CONCEPT

Together, we will decide which type of analysis offers the greatest value for your team size and your objectives.

You can find our **entire product range** in our **catalogue** and in the **shop.**
