**HEAVY DUTY –
STRONG & SIMPLE**

We have made our SYSTEM FLEX mounting profiles even stronger!

Heavy Duty mounting profile

Art.-No. 73308010

The double SYSTEM FLEX mounting profiles can carry even more weight, and nothing will make them waver. Naturally, you can still attach your SYSTEM FLEX accessories to the mounting profiles, and adjust them quickly and easily.

Reinforcement strut for shelves

Art.-No. 73314400

An additional support is available for SYSTEM FLEX shelves, turning the standard shelves into a heavy-duty version. The reinforcement strut is attached to the mounting profile and to the carrier arm of the shelf.

Heavy Duty retracting shelf

Art.-No. 73304100 / 73304200 / 73304101 / 73304201

You can easily accommodate printers, air cushion machines or other „heavy equipment“ with the matching retracting shelves for the double mounting profiles. With these, you can also access your equipment ergonomically, e. g. when you need to change a material roll.
